- Share pics! Upload images to our photo gallery.

Check out our newest tire test videos and you'll notice some new members in our fleet. Why was it time for a change?

As performance tire capabilities have continually improved, we needed a chassis that could challenge the limits of the best tires a little more than our BMWs could. However, we needed a vehicle that could still work to evaluate the ride comfort of touring tires out on the road. Subaru's newest edition of the BRZ checks all of our boxes.

As for the SUVs, we needed a platform that could accommodate a wide range of fitments so we could test a wider range of tires: Highway All-Season, Crossover/SUV Touring All-Season, and On-/Off-Road All-Terrain tires. The Ford Explorer ST can do that, and brings a brake package and handling that make it suitable and consistent on our test track for safe, reliable, repeatable test data.

BE READY FOR WINTER

LOVE YOUR WINTER TIRES?

We're glad you've discovered the ultimate in winter traction. They all carry the 3PMSF symbol, and typically provide light snow traction that far exceeds the minimum standard required to earn it. Plus, they place additional emphasis on traction in slushy and icy conditions, which isn't part of the 3PMSF testing.

When safety and mobility are your top priority, nothing gets you through extreme cold, ice, snow, and slush as well as a dedicated winter tire.

See Pages 12-17

PREFER ALL-SEASON TIRES?

Not everybody lives in the snow belt. If your corner of the country only experiences mild winter weather, you may be able to get by with a set of all-season tires. Even for those in snowier climates, sometimes managing two sets of tires doesn't fit into your lifestyle (or your living space).

If that's the case for you, check out our awesome selection of All-Season and All-Terrain tires, and keep your eyes open for the tire industry's 3PMSF symbol on select tires. Tires have to provide a minimum standard of light snow traction to earn the symbol, so it can guide you to tires that meet that standard.

See Pages 18-29

Did You Know?

You can filter your tirerack.com search results by 3PMSF.

NOT SURE WHAT'S RIGHT FOR YOU?

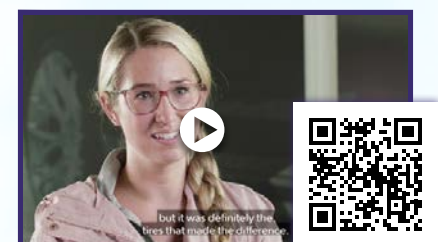

Are winter tires worth it? Or are all-season tires sufficient for your needs? We want to help you make an informed decision so you can tackle winter with tires that make a difference!

We'll help you get there.

Call one of our experts for personalized advice.

Join us on the ice to see what a difference winter tires make.

See what some of our own skeptics said about winter tires.

Turn the page to learn what makes winter tires special.

WHAT MAKES WINTER TIRES SPECIAL?

TREAD COMPOUND

Specialized rubber compounds remain pliable in sub-freezing temperatures, allowing a winter tire's tread to conform to the micro- and macro-texture of the surface, whether it's clear road, packed snow or ice.

Select Studless Ice & Snow tires utilize sophisticated techniques that enable the tire to **wick away** the thin layer of water that develops when driving over packed snow and ice.

Microscopic grit in the tread rubber creates mechanical grip for enhanced traction on low-friction surfaces.

TREAD DEPTH

Winter tires typically feature deeper initial tread depth than their all-season counterparts.

The **extra depth** allows the tire to process a larger volume of snow, essentially taking bigger "bites" for traction.

Many winter tires feature Winter Wear Indicators, also called **Snow Platforms**, molded into the tread design that let the driver know the remaining tread is reaching the end of its ability to provide beneficial snow traction.

TREAD PATTERN

The tread pattern of a winter tire has to deal with clear roads, rain, slush, snow and ice, often simultaneously.

Wide, circumferential and lateral **grooves** evacuate water and slush, and can process a larger volume of snow.

Winter tires feature tread elements designed to hold snow within the tread for snow-to-snow traction, like **intricate sipes** that also create thousands of biting edges to provide grip in the worst winter weather.

STUDLESS ICE & SNOW

Developed to provide superior traction on ice and snow, Studless Ice & Snow winter tires deliver confidence-inspiring capability in a variety of inclement weather. No matter the combination of sub-zero temperatures, through slush and snow, or on ice, Studless Ice & Snow winter tires' sure-footed grip has made them the #1 winter tire category.

BLIZZAK WS90

Developed to provide drivers with confident control in a variety of difficult winter weather conditions, Blizzak WS90 winter tires are designed to be at their best when winter driving conditions are at their worst.

BLIZZAK DM-V2

In pursuit of optimal grip in snow, and on ice, Bridgestone developed the Blizzak DM-V2 for crossovers, SUVs and light trucks with a focus on combining competent ice traction and braking with wet road handling and hydroplaning resistance. Our test results demonstrate a winter traction tour de force.

STUDDABLE WINTER/SNOW

Developed to use optional metal studs that provide enhanced ice and hard-packed snow traction. Studdable Winter/Snow tires trade some noise quality and ride comfort for enhanced ice traction when studded. When not studded, they provide a low-cost winter tire option. Full-pattern studding is available for \$15 per tire.

Note: Metal stud use is restricted in some states.

READY-TO-BOLT-ON WINTER PACKAGES

Tire Rack's Winter Tire & Wheel Packages make changing to winter tires easy and efficient.

- High quality, vehicle-specific fitments
- 4 tires and 4 wheels, plus all necessary hardware at no extra cost
- Includes free scratchless mounting and Hunter RoadForce™ balancing
- Arrives ready to bolt on your vehicle – you can do it yourself!

What about TPMS? If your vehicle is equipped with a direct tire pressure monitoring system, we can recommend wheels that are compatible with its sensors. An extra set of sensors is also available for most systems, and can arrive pre-installed on your package.

Build a package at
WWW.TIRERACK.COM/SNOW

ALL-SEASON

Developed for year-round use, even in light snow, All-Season tires provide capable traction in all weather conditions and present a satisfactory solution for drivers who prefer not to manage both All-Season and dedicated Winter tires, or who live in an area that experiences mild winters.

Shown here are Ultra High Performance All-Season tires. Because these tires prioritize driving dynamics and dry and wet traction, they typically give up some light snow traction compared to other All-Season tire categories.

Some All-Season tires meet the industry's severe snow service requirements and are branded with the **three-peak mountain snowflake (3PMSF) symbol**. These offerings typically deliver the very best wintertime traction within the category.

On pages 21-29 you will find Touring All-Season tires, Highway All-Season truck tires, and All-Terrain tires — including many that carry the 3PMSF symbol.

ULTRA HIGH PERFORMANCE ALL-SEASON

POTENZA RE980AS+

Leveraging a new, updated tread compound, the Potenza RE980AS+ is designed to provide reliable light-snow traction for year-round performance. The noise-optimized tread pattern balances wet traction with pleasant road manners while generating crisp steering response and predictable handling.

Shown with an MSW Type 73 wheel

EXTREMECONTACT DWS 06 PLUS

Utilizing SPORTPLUS+ Technology and an updated, performance-tuned all-season compound, the ExtremeContact DWS 06 Plus is built for enhanced handling and braking performance in the dry and wet. Winter performance has also benefited from the advanced compound and combines with X-Sipes and high angle, crisscross grooves for improved grip and stability in snow and on ice.

PILOT® SPORT ALL SEASON 4

Offers high levels of traction and controls the moment no matter the condition, even in light snow. The 360° Variable Sipes create interlocking, dynamic biting edges that improve traction in slippery conditions.

Shown with an O.Z. Racing Ultraleggera HLT wheel

NEW **DEFENDER2**
Standard Touring All-Season

Defender2 tires are built to combine long, durable tread life with capable all-season performance. An optimized symmetric tread design featuring interconnected tread elements assists dry grip, while wide, circumferential grooves, lateral notches, and integrated sipes combine for satisfying traction in wet and wintry conditions.

TOYO TIRES®

NEW **CELSIUS SPORT**
Grand Touring All-Season

Designed for refined looks, precise handling, and driving comfort, the Celsius Sport features interlocking multi-wave sipes in the outboard tread elements for cornering stability and zigzag-shaped inboard tread blocks with high-density sipes for confident light snow traction. An ultra-high performance casing construction improves cornering performance and high-speed stability for spirited all-season driving.

Shown with a Borbet Type W wheel

NEW WEATHERPEAK
Grand Touring All-Season

With luxurious comfort and reliable performance in mind, the WeatherPeak is intended to inspire confidence. Sure-footed shoulder blocks, evolving sipes, lateral notches, and circumferential grooves all combine for competent traction in any season. Snow Vices and a severe snow service rating help deliver satisfying traction in slush and light snow conditions.

DRIVEGUARD PLUS

Grand Touring All-Season

Enhanced luxury, increased year-round traction, and the added peace of mind from Bridgestone's next generation run-flat technology that maintains mobility even after experiencing a tire puncture for up to 50 miles at up to 50 mph.

Shown with an ALUTEC Monstr wheel

ALENZA AS ULTRA

Crossover/SUV Touring All-Season

Developed for a luxurious ride and predictable traction for any condition, the Alenza AS Ultra is designed to elevate your drive. A high-silica compound enhances inclement weather stability and QuietTrack Technology helps reduce noise for a refined driving experience.

Shown with a Sport Tuning M1 wheel

Now Offering

P7 AS PLUS 3
Grand Touring All-Season

Leveraging advanced design technology, the P7 AS Plus 3 balances dependable traction and predictable handling with a luxurious ride focused on delivering smooth operation and low road noise. The optimized footprint helps improve wear characteristics and combines with full-depth features to offer sure-footed grip as the tire wears.

Shown with a Borbet Type W wheel

SCORPION AS PLUS 3

Crossover/SUV Touring All-Season

Utilizing functionalized polymers and full-depth features, the Scorpion AS Plus 3 is engineered to deliver confident traction throughout the tire's life while also providing even tread wear and enhanced mileage. The evenly distributed grooves and channels work in unison to elevate hydroplaning resistance while providing maximum contact with the road surface.

Shown with an LP Aventure LP6 wheel

GENERAL TIRE

ALTIMAX RT45

Grand Touring All-Season

Robust interlocking tread blocks provide reliable handling and dry grip. Full-depth circumferential grooves evacuate water for hydroplaning resistance, while lateral voids, shoulder notches, and sipes create additional biting edges to improve traction and peace of mind.
